*Reasons for Allowance*

The following is an examiner's statement of reasons for allowance:

The subject matter of the independent claims could not be found and was not suggested by the prior art of record. The subject matter not found was a physiological monitoring device having a processor adapted to determine whether a first amount of time exceeds a predetermined amount of time, and if it does not exceed the predetermined amount of time to calculate an amount of fluid to be infused, in combination with the features of the claims. The examiner is interpreting the phrase "processor is adapted to" to mean that the processor is actually programmed to perform that function, not that it is inherently capable of being programmed to perform that function. To meet this claim limitation the prior art must explicitly disclose a processor that is actually programmed to perform this function. This feature could not be found in the prior art.

The closest prior art of record is Lebel et al (US 2002/0019606). Lebel discloses a microprocessor controlled infusion apparatus having a communicator device. This device includes electronic control circuitry, an infusion device, and a processor, but fails to disclose that the processor is adapted to perform the functions of applicant's claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
